

Access Rights required for AX 2012 Lasetnet Connector

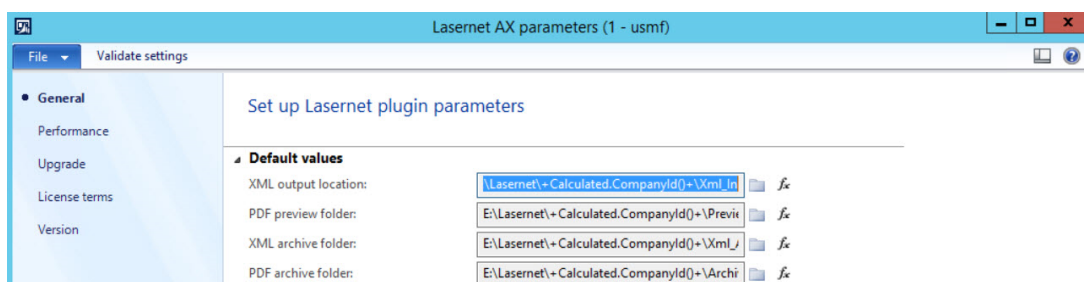

- 2022-12-06 - Comments (0) - AX 2012 FAQs

This article provides information about folder rights and user rights (four Folders that are shared between AX & Lasetnet Server)

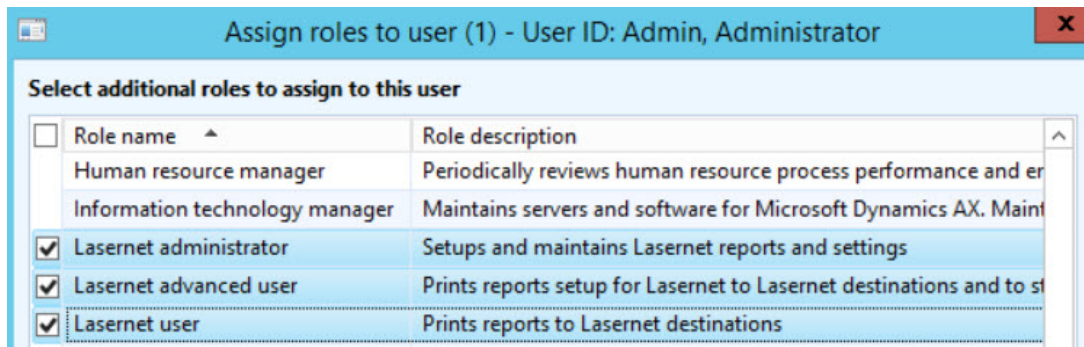

Folders: AX and the Lasetnet server

Below is an overview of the rights to the different folders that we use both from AX and the Lasetnet server:

Folder	Who needs access
XML output location	Lasernet service account - Read, Write, Delete AOS service account - Read, Write, Delete
PDF preview folder	Lasernet service account - Read, Write AOS service account - Read, Write, Delete
XML preview	Lasernet service account - Read, Write AOS service account - Read, Write, Delete
PDF archive folder	Lasernet service account - no access is needed AOS service account - Read, Write, Delete

LAC user roles:

User role	Description
Lاسernet administrator	This role provides full access to the Lاسernet Connector including the option to configure reports for Lاسernet and add additional data to the Lاسernet reports. It is possible to select standard and the Lاسernet destinations within the printer dialog. The role also includes providing access to the Lاسernet archive
Lاسernet advanced user	This role allows the user to select Lاسernet and standard destinations within the printer dialog but does not provide any further access to the Lاسernet Connector. The user will also have access to the Lاسernet archive. If the reports are not configured for Lاسernet the user will only have access to the standard destinations (SSRS)
Lاسernet user	This role only provides access to the Lاسernet destinations within the printer dialog and the Lاسernet archive, if the reports are configured for Lاسernet
