

## Error Message: 'Error during AOS update: Unable to resolve dependency 'dynamicsax-lasernet'.'

- 2023-11-30 - Comments (0) - Lاسernet FO Connector FAQs

# Lasernet for Dynamics 365

When deploying a software deployable package, the following error message may be displayed:

```
[2020-09-14 13:58:00Z] Error during AOS update: Unable to resolve dependency 'dynamicsax-lasernet'.  
[2020-09-14 13:58:00Z]
```

The error occurs because not all models that have dependency are included in the deployable package. The solution is to include all models.

### **Check your model dependency**

To check your model dependency, follow these steps:

1. Open **Visual Studio** > **View** > **Explorer** > **Model view**.
2. Right-click model and select **View package dependencies** > **View incoming references**.
