# How do I disable LDAP in Autoform DM?

Ross Glover - 2022-08-04 - Comments (0) - Autoform DM FAQs

# Autoform DM

There are times when you will need to log into Autoform DM using a local user, for example:

**Scenario 1**
You need to disable LDAP to update the LDAP settings.

**Scenario 2**
Your LDAP server is down/unreachable and you need to disable LDAP without logging into Autoform DM.

**Scenario 1 -LDAP is currently running but needs disabling**
There is the option to turn off LDAP.:

1. Log in and click **Administration** in the left side of the window.

2. Under *System Modules*, click **LDAP settings configuration**.

2. Clear the **LDAP integration enabled?** checkbox.

Ensure the next step is performed out of hours, or ensure all users are aware they will be logged out automatically.

3. Select **Yes** to proceed.
