

How Do I Update My Lاسernet License?

Alex Clemons - 2025-01-20 - Comments (0) - Lاسernet FAQs

Lاسernet

After upgrading your Lاسernet server to include additional modules and packages, it is necessary to update/reactivate your Lاسernet license. This will enable you to benefit from the new features available in your new license. To do this, follow these steps and/or watch our [video tutorial](#):

1. Open the Windows **Start** menu and search for the Lاسernet License Manager.

Note

Starting with Lاسernet 10.2, the License Manager is divided into the following applications:

Lاسernet Server License Manager 10

Lاسernet Developer License Manager 10

2. Open the **Lاسernet Server License Manager 10** and select the required service instance.

3. In the toolbar, click **Reactivate**.

The license is now updated.

4. Repeat the process in the **Lاسernet Developer License Manager 10** to reactivate the Lاسernet Developer license.

Offline Reactivation/update

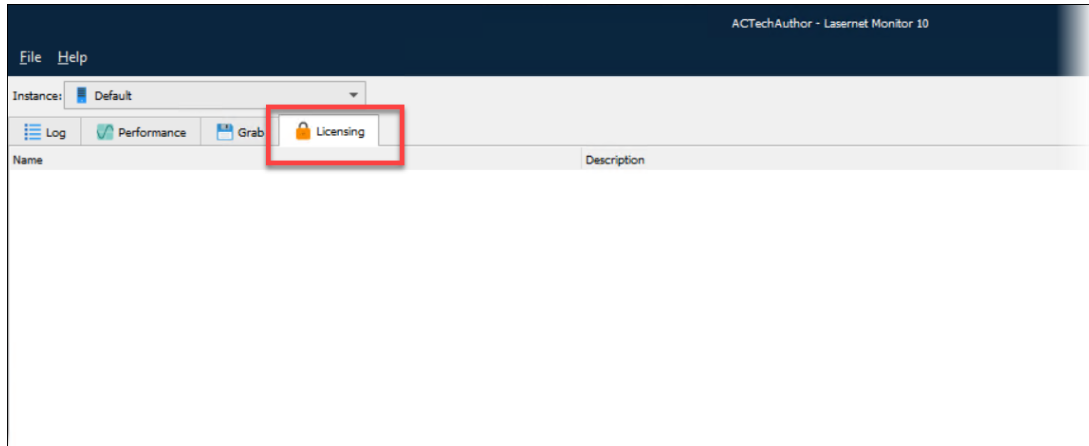

To perform an offline reactivation, you must first deactivate the server or Lاسernet Developer using the offline deactivation process. When the deactivation process is complete, you must perform the offline activation process.

How Do I Check That My License Has Been Updated?

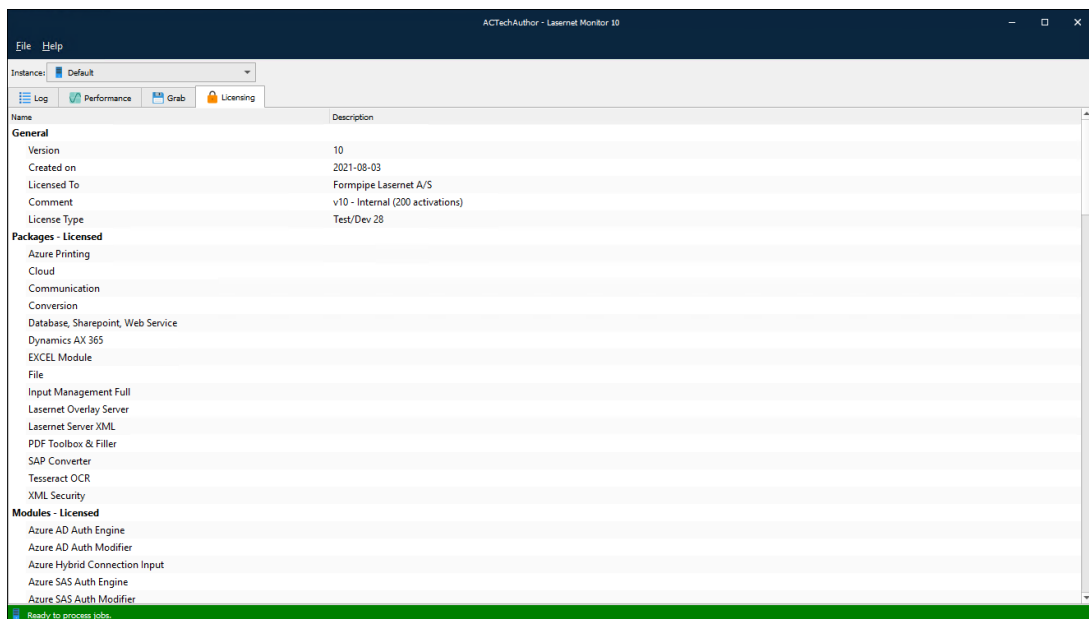

To ensure your license has been updated to include additional modules and packages, you can use the Lاسernet Monitor application. Please follow these steps:

1. Open the Windows **Start** menu and search for the Lاسernet Monitor 10.

2. Scroll down the services list and open the Lasernetet Monitor 10.
3. Enter your credentials to connect to Lasernetet and select the relevant instance from the **Instance** dropdown menu.
4. Click the **Licensing** tab.

This will display a list of modules and packages that are included in your current license.
