How do I update my Lasernet license?

Alex Clemons - 2021-10-04 - Comments (0) - Lasernet FAQs

When you have upgraded your Lasernet server to include additional modules and packages, there is a need to update/reactivate your Lasernet license. This will enable you to benefit from the new features available in your new license. To do this, follow these steps below, and/or watch our video tutorial:

Video Tutorial

Learn how to update/reactivate a license with the help of our video tutorial, *Lasernet License Manager Part Three*. Click the **Watch Video** button below:
