

Models and Prerequisites for Lاسernet FO Connector Installation

Alice Petruzzella - 2024-06-05 - Comments (0) - D365 FO Connector General Information

Lasernet for Dynamics 365

Models

Lasernet Connector for Dynamics 365 Finance and Operations contains the following models, including the model for the integration with **Lasernet CE Connector** and the models for the **Lasernet Print Buttons**.

Model	Description	Location/remark
Lasernet	Core and main engine for Lاسernet FO Connector	Lasernet Requires activation Key Lasernet > Setup > Parameters > License terms
Lasernet81Spec	Additional requirements in relation to 8.1 and newer versions of standard Lاسernet FO Connector	
PRNButtons	Lasernet print buttons	Print buttons
PRNButtonsLACAdaptor	Adaptor between the Lاسernet print buttons and Lاسernet	
LACCE	Provide the integration to CE from Lاسernet FO Connector	Lasernet > Dataverse/Dynamics 365
LACMSHotfixes	Hotfixes for standard Lاسernet FO Connector	System Administration > Setup > Hotfixes from Lاسernet
Lasernet Test Suite	Test & Performance Suite	Lasernet > Test and performance suite Requires activation Key Lasernet > Test & performance suite > Parameters

LasernetPU35Spec

Support of Wave labels in
Lasernet FO Connector

Lasernet Autoform DM Integration to the Autoform

Note

The class **LACSrsPrintDestinationSettings_Extension** is now named
SrsPrintDestinationSettings_LAC_Extension.

If errors related to **LACSrsPrintDestinationSettings_Extension** occur, some objects or models may not be checked in. Another possible problem is that not all models have been built.

Ensure the following new objects/dll files are added to TFS in case you are not just installing/deploying the AOT package:

- LACSupport.dll.config
- XmlDiffPatch.dll
- XmlDiffPath.View.dll

The following is the complete list of objects that are not automatically added.

The version number should contain the intended version (such as in the following screenshot, 6.21) after either installing or deploying the AOT package.

Lasernet > Setup > Parameters

Add the AOT package

Either through LCS - Apply a deployable package to an environment

<https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/deployment/apply-deployable-package-system>

Or by installing a deployable package - Requires RDP access to environment

<https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/deployment/install-deployable-package>

Different versions of Lasernet FO Connector are supported with different versions of Lasernet. A setup for each newer version of Lasernet is required for any new installation and when upgrading from an older version of Lasernet.

Prerequisite/Technical

It is best practice to refresh the Stylesheet after upgrading Lasernet FO Connector as this could help avoid potential issue(s).

Use the following Register selection classes, located in **Lasernet > Setup > Backup parameters > Setup Default Selections**, in case an error like the following is thrown when using **Export, Import, or Copy across companies**.

The newly introduced upgrade framework in Lasernet FO Connector 6.18 should manage but could fail when using a TFS/Dev build as this would require executing [Microsoft.Dynamics.AX.Deployment.Setup.exe](#).

Error message

Error

Please try to run 'Register selection-classes' before processing.

OR

Error

Cannot create a record in Lasernet default export/import selection (LACDefaultSelection).
The record already exists.

Object reference not set to an instance of an object.
