

Swiss QR Code (required for Swiss payment documents)

- 2024-07-25 - Comments (0) - Lاسernet Developer FAQs

Lasernet

This article provides a solution for how to create QR Codes for Swiss payment documents. QR Codes created in Lاسernet can be used to generate Swiss QR Code symbols as long as the Swiss cross is overlaid in the center of the symbol.

According to the Swiss Implementation Guidelines, "To increase the recognizability and differentiation for users, the Swiss QR Code created for printout is to be overlaid with a Swiss cross logo measuring 7 x 7 mm. A corresponding file with the logo can be downloaded from the <https://www.paymentstandards.ch/en/shared/downloads.html> website's download section at www.paymentstandards.ch".

Logo with the swiss cross attached here along with an example form, data provided as insert text to the barcode rearrange and fetched from [here](#)
