Which ports need to be unblocked for Lasernet?

Kate Coles - 2024-09-30 - Comments (0) - Lasernet FAQs

The following ports must be unblocked to enable a Lasernet system to operate.

Lasernet 10

Component	Port	Notes
Lasernet Service	3279 / TCP	Default port. Can be configured to use a different port. If multiple Lasernet services are running on the same server, each one must have a unique port number.
Config Server	33443 / TCP	Default port. Can be configured to use a different port.
Developer	33443 / TCP	Default port. Can be configured to use a different port.
Printer Service	3278 / TCP	Cannot be configured to use a different port.

Lasernet 9

Component	Port	Notes
Lasernet Service	3279 / TCP	Default port. Can be configured to use a different port. If multiple Lasernet services are running on the same server, each one must have a unique port number.
Config Server	3479 / TCP	Default port. Can be configured to use a different port.
Developer	3379 / TCP	Default port. Can be configured to use a different port.
