BPM Release Version 2.0

Release date: 21st September 2012

New Features and Fixes

The purpose of this section is to outline the new features and fixes of BPM version 2.0.

- New and improved Web UI built using Vaadin.
- Dynamic Overview and Queue tabs automatically update to display job runtime status.
- Admin reporting configuration.
- DM Server configuration.
- Job Configuration, using Freemarker templating language.
- Authentication required for access.
- Generic Jobs.
- Document Import.
- Document Export.
- Document Email.
- Multi-Document Email.
- Uses Freemarker templating language for job configuration.
- Jobs can be triggered by either a schedule or by other jobs completing.
- Interactive .exe installer.
- Creates/updates database tables automatically on startup.

Misc

- Utilises OSGi to resolve dependencies between bundles and allow runtime deployment of job bundles.
- Binary compatibility enforced on build.
- Runs on an OSGi enabled application server maintained by Eclipse called Virgo.
