

Lاسernet FO Connector 6.18 Released!

2022-09-23 - Pernille Wichmann - Comments (0) - Lاسernet FO Connector News

Lاسernet for Dynamics 365

The Lاسernet FO Connector 6.18 is now available for download here on our support portal.

Remember to read through the release notes, as they contain examples of how new features may be applied. The software package, manuals and release notes may be found here:

- Click to view [Lاسernet FO Connector 6.18 Release Notes](#)
- Click to download the [Lاسernet FO Connector 6.18 Installation Package](#)
- Click to view the [new features, enhancements, and fixes](#)

The package for Lاسernet Connector exists for Dynamics 365 for Finance & Operations **PU52** and **PU53**.

There is no need to install a new package when upgrading Dynamics 365 for Finance & Operations. The originally installed Lاسernet Connector package for Dynamics 365 for Finance & Operations will work after the upgrade of PU.

The recommendation from Microsoft is to use an ISV/LAC-package matching the same build or PU as this could lower the memory usage. However, all (three) Lاسernet FO Connector packages contain the same code and will work across versions.

Deployments or Installations of Lاسernet FO Connector packages are forward compatible and therefore it is not possible to deploy or install a **Lاسernet Connector package for PU53** when using Dynamics 365 for Finance & Operations **PU49** or **PU50**.
