Lasetnet FO Connector 6.18.2 Released!

2022-12-16 - Alex Clemons - Comments (0) - Lasetnet FO Connector News

Lasetnet for Dynamics 365

The Lasetnet FO Connector 6.18.2 is now available for download on our support portal.

Remember to read through the release notes, as they contain examples of how new features may be applied. The software package, manuals and release notes may be found here:

- Click to download the [Lasetnet FO Connector 6.18.2 Installation Package](#)
- Click to view the [Lasetnet FO Connector 6.18.2 Release Notes](#)
- Click to view the [new features, enhancements, and fixes](#)

The package for Lasetnet FO Connector exists for Dynamics 365 for Finance & Operations PU52, PU53 and PU54.

There is no need to install a new package when upgrading Dynamics 365 for Finance & Operations. The originally installed Lasetnet FO Connector package & Operations will work after the upgrade of PU.

The recommendation from Microsoft is to use an ISV/LAC-package matching the same build or PU as this could lower the memory usage. However, all (three) Lasetnet FO Connector packages contain the same code and will work across versions.

Deployments or Installations of Lasetnet FO Connector packages are forward compatible and therefore it is not possible to deploy or install a Lasetnet FO Connector package for PU54 when using Dynamics 365 for Finance & Operations PU49 or PU50.
