Lasernet FO Connector 6.18.4 New Features/Fixes

2023-06-08 - Kacper Dylewski - Comments (0) - Lasernet FO Connector New Features

Release version: 6.18.4

Release date: 8th June 2023

Introduction

This page describes the enhancements in Lasernet FO Connector 6.18.4.

Click to view the Release Notes page.

Models

Lasernet 6.18.4 contains the following models, Including the model for the integration with

D365CE (Dataverse) and the models for the **Lasernet print buttons**.

Model	Description	Location / Remark
Lasernet	Core and main engine for Lasernet FO Connector	Lasernet **Requires activation Key** Lasernet > Setup > Parameters > License terms
Lasernet81Spec	Additional requirements in relation to 8.1 and newer versions of standard Dynamics 365 Finance and Operations	
PRNButtons	Lasernet print buttons	Print buttons
PRNButtonsLACAdaptor	Adaptor between the Lasernet print buttons and Lasernet	
LACCE	Provide the integration to CE from Lasernet FO Connector	Lasernet > Dataverse/Dynamics 365
LACMSHotfixes	Hotfixes for standard Dynamics 365 Finance and Operations	System Administration > Setup > Hotfixes from Lasernet

Lasernet Test Suite	Test & Performance Suite	Lasernet > Test and performance suite **Requires activation Key** Lasernet > Test & performance suite > Parameters
LasernetPU35Spec		Support of Wave labels in Dynamics 365 Finance and Operations
Lasernet Autoform DM	Integration to the Autoform (Archive)	

Objects

Please ensure the following new objects/dll-files are added to TFS in case of not just installing/deploying the AOT-package.

·   LACSupport.dll.config

·   XmlDiffPatch.dll

·   XmlDiffPath.View.dll

And the following is the complete list of objects which isn't automatically added

The version number should contain version 6.18.4 like the following after either installing or deploying the AOT-package.

Lasernet > Setup > Parameters

Version Number: 10.0.34 (PU58): 6.18.4.2306031

Add the AOT-package

Either through LCS - Apply a deployable package to an environment

https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/deployment/apply-deployable-package-system

Or by installing a deployable package – Requires RDP access to environment

https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/deployment/install-deployable-package

Lasernet FO Connector 6.18.x is supported with Lasernet version 9 and Lasernet version 10 and a setup for either Lasernet version 9 or Lasernet 10 is required for any new installation

and when upgrading from Lasernet 8.

Pre-requisite / Technical

It is best practice to do a Stylesheet refresh after upgrading Lasernet FO Connector as this could help with avoiding the potential issue(s).

Please use the following Register selection-classes located in **Lasernet** > **Setup** > **Backup parameters** > **Setup Default Selections** in case an error like the following is thrown when using **Export**, **Import** or **Copy across companies** (legal entities).

The newly introduced upgrade framework in Lasernet FO Connector 6.18 should manage but could 'fail' in a scenario when using a TFS/Dev build as this would require executing Microsoft.Dynamics.AX.Deployment.Setup.exe.

Error

Please try to run 'Register selection-classes' before processing

OR

Cannot create a record in Lasernet default export/import selection (LACDefaultSelection). The record already exists.

Patch Release - Lasernet FO Connector 6.18.4

Lasernet FO Connector 6.18.4 is a patch release for Dynamics 365 Finance and Operations PU58 and ensures compliance between Lasernet FO Connector and Dynamics 365 Finance and Operations PU58.

None of the previous versions of Lasernet FO Connector (6.18.3 or older) are compatible with PU58 as some files used for Azure have been updated in Dynamics 365 Finance and Operations 10.0.34 (PU58).

Customers using Lasernet FO Connector 5 or 6.18.3 (or older) would need Lasernet FO Connector 6.18.4 when upgrading to 10.0.34 (PU58).

A few issues that were identified when upgrading from Lasernet FO Connector 5 to Lasernet FO Connector 6 have also been identified and fixed in Lasernet FO Connector 6.18.4.

The main areas of focus in Lasernet FO Connector 6.18.4 are:

· **Quality**

·   **Reliability**

·   **Stability**

Note

Lasernet FO Connector 6.18.4 is compliant with Dynamics 365 Finance and Operations 10.0.34 (PU58).

Bug Fixes and enhancements - Lasernet FO Connector 6.18.4

365703@LAC365FO – Import error: Could not import backup from compressed archive (Updating from Lasernet FO Connector 5)

The following error was thrown when importing a backup from Lasernet FO Connector 5 containing a condition into Lasernet FO Connector 6:

Error

Object reference not set to an instance of an object.

Could not import backup from compressed archive.

This has been fixed in Lasernet FO Connector 6.18.4.
