Lasernet 10.9 Release Notes

2024-10-24 - Sunil Panchal - Comments (0) - Lasernet 10 Release Notes

Release version: 10.9

Release date: 24th October 2024

Notes

[Software installation files](#) are available.

Maintenance Report

This section briefly describes the fixes and enhancements in Lasernet 10.9.

Fixes and Enhancements

Internal Ref.	External Ref.	Area	Details	Status
426880	39015	Barcode Reader	Extended the module to support page settings in PDF input.	Enhancement
413182, 415871		Config Server	It is possible to set the Admin user's permissions to deny them access to the Security Roles area.	Fixed
429733	39174	Config Server	The **Revision** column in the **Deploy Configuration** window is sorted in a random order.	Fixed
420754		Developer	Inactive form thumbnails are not hidden when **Toggle hide inactive** is selected.	Fixed
420893		Developer	Cannot click **Cancel** in various objects' **Properties** window if **Name** is empty.	Fixed
420812		Developer	The column for inactive phrases cannot be sorted.	Fixed
420932		Developer	Removed the Mixed item from the Flag dropdown list for form, subforms, and phrases (because it was not a supported value).	Fixed

435024	40116	Developer	Performance issue when **Description** column is set to auto-resize for a list of forms.	Fixed
429400		Developer	The object list filter in the export tool prevents the export of any already-selected objects that are hidden because they do not satisfy the filter.	Fixed
429963, 432610		Developer	Optimized speed when opening a regional profile in a configuration that has many regional profiles and forms.	Enhancement
420478		Developer	An `Object does not exist` warning appears when a script function is selected and properties are changed in the property editor.	Fixed
420782		Form Editor	A crash occurs when inserting an EMF image from the **Choose an image file** tool.	Fixed
435599		Form Editor	After a drag and drop of an image from the `Resources > Image` folder, the reference to an image object contains the full path instead of the image name.	Fixed
437494	40134	Form Editor	Escape characters for JSON strings are not correctly parsed.	Fixed
433633	39899	Form Editor	If a server-level JobInfo is used in criteria for a rearrange on a subform, that criteria is never satisfied.	Fixed
435607	40169	Form Editor	If the string in a rearrange contains a newline character, and the Font Point Size feature is in use, resizing the text box does not auto-change the font size.	Fixed
437993	39152	Form Editor	Implementation of the `substring-before` and `substring-after` XPath functions is incorrect.	Fixed
434745	40078	Form Editor	Some keyboard behaviors in the user interface are incorrect.	Fixed

410273		Form Editor	If a change made to a shape style profile is previewed and then the window is closed, the change is saved rather than discarded.	Fixed
415301	37748, 37283	Form Editor	Sheets are still combined when the output format of a sheet is changed from EMF to (for example) PDF.	Fixed
429842		Form Editor	Particular XPath expressions that use built-in String functions may return a Boolean `true` instead of an empty string.	Fixed
424604	38609	Installer	Updated the bundled Microsoft OLE DB Driver 18 for SQL Server from version 18.6.7 to 18.7.2 due to a possible security vulnerability.	Fixed
432418	37315	Outlook Mail	Added support for error codes and reasons when a job fails.	Enhancement
421524	38196	Printer Output / Printer Service	Added support for printing multiple copies of DOCX and PDF documents as the primary job by setting the `Copies` JobInfo. The feature was previously supported for attachments only.	Enhancement
424003	38586	XML Transformer Editor	An **Error executing action** message can appear when running a modifier.	Fixed
435466	40172	XML Transformer Editor	Expressions such as `concat()` convert HTML reserved characters within text into XML entities.	Fixed
423131		XML Transformer Editor	The **Close Tab** context menu item is active when no grab files are loaded.	Fixed
437122	40366	Scripting Printer Service	Modified `getPrinterProfiles()` to return printers that have only the Default printer profile.	Enhancement

Lasernet 10 System Requirements

# Important Information to Read Before Upgrading to Lasernet 10.9

New Installers, Connections, Sign in, and SDK from Lasernet 10.2

The installation procedure and the configuration procedure, in several of the client applications, changed at Lasernet 10.2. There are now separate installers for Lasernet Server 10 and Lasernet Developer 10.

If you currently have Lasernet 10.1.4 or earlier and have not read the release notes for Lasernet 10.2, it is recommended that you do so before you install Lasernet 10.9. The information provided there is crucial for upgrading to Lasernet 10.2 and later, and also describes changes that affect third-party modules developed with the Lasernet SDK.

How to Get Support

If you encounter difficulty using Lasernet, contact us via the **Create Ticket** button in the support portal.
