## Lasernet FO Connector 6.21.1 Release Notes

2024-07-12 - Alice Petruzzella - Comments (0) - Lasernet FO Connector Release Notes

# ✖Lasernet for Dynamics 365 Finance and Operations

**Release Version: 6.21.1**

**Release date:** 12th July 2024

# Notes

Click to download [Lasernet FO Connector 6.21.1](#).

Click to view the [bug fixes](#) in more detail.

# Maintenance Report

This page describes the bug fixes in Lasernet FO Connector 6.21.1.

Version numbers:

Dynamics Finance and Operations 10.0.38 PU62 Version: 6.21.1.2407101

Dynamics Finance and Operations 10.0.39 PU63 Version: 6.21.1.2407102

Dynamics Finance and Operations 10.0.40 PU64 Version: 6.21.1.2407103

Bug Fixes

| Case No. | Area | Description | Ticket No. |
|---|---|---|---|
| 431539@LAC365FO | Menu | The Lasernet module is now back in the Modules menu. | |
| 431034@LAC365FO | Memory | An error occurs when the memory is insufficient to run a script. | #39282 |
| 430808@LAC365FO | Report initialization | When a user runs replacement reports for the first time after usage data is cleared, SSRS reports are printed instead. | #39375 |
| 430430@LAC365FO | Serializing | An error occurred when exporting report: LACValueSegment object does not have method 'packClassName' | #39289 |

# Models

Lasernet Connector 6.21.1 for Dynamics 365 Finance and Operations contains the following models, including the model for the integration with **Lasernet CE Connector** and the models for the **Lasernet Print Buttons**.

| Model | Description | Location/remark |
|---|---|---|
| Lasernet | Core and main engine for Lasernet FO Connector | Lasernet<br><br>**Requires activation Key**<br>Lasernet > Setup > Parameters > License terms |
| Lasernet81Spec | Additional requirements in relation to 8.1 and newer versions of standard Lasernet FO Connector | |
| PRNButtons | Lasernet print buttons | Print buttons |
| PRNButtonsLACAdaptor | Adaptor between the Lasernet print buttons and Lasernet | |
| LACCE | Provide the integration to CE from Lasernet FO Connector | Lasernet > Dataverse/Dynamics 365 |
| LACMSHotfixes | Hotfixes for standard Lasernet FO Connector | System Administration > Setup > Hotfixes from Lasernet |
| Lasernet Test Suite | Test & Performance Suite | Lasernet > Test and performance suite<br><br>**Requires activation Key**<br>Lasernet > Test & performance suite > Parameters |
| LasernetPU35Spec | | Support of Wave labels in Lasernet FO Connector |
| Lasernet Autoform DM | Integration to the Autoform (Archive) | |

Note

The class **LACSrsPrintDestinationSettings_Extension** is now named **SrsPrintDestinationSettings_LAC_Extension**.

If errors related to **LACSrsPrintDestinationSettings_Extension** occur, some objects or models may not be checked in. Another possible problem is that not all models have been built.

Ensure the following new objects/dll files are added to TFS in case you are not just

installing/deploying the AOT package:

- LACSupport.dll.config

- XmlDiffPatch.dll

- XmlDiffPath.View.dll

The following is the complete list of objects that are not automatically added.

The version number should contain the intended version (such as in the following screenshot, 6.21.1) after either installing or deploying the AOT package.

**Lasernet > Setup > Parameters**

Add the AOT package

**Either through LCS** - Apply a deployable package to an environment

https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/deployment/apply-deployable-package-system

**Or by installing a deployable package** – Requires RDP access to environment

https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/deployment/install-deployable-package

Different versions of Lasernet FO Connector are supported with different versions of Lasernet. A setup for each newer version of Lasernet is required for any new installation and when upgrading from an older version of Lasernet.

# Prerequisite/Technical
It is best practice to refresh the Stylesheet after upgrading Lasernet FO Connector as this could help avoid potential issue(s).

Use the following Register selection classes, located in **Lasernet** > **Setup** > **Backup parameters** > **Setup Default Selections,** in case an error like the following is thrown when using **Export**, **Import,** or **Copy across companies**.

The newly introduced upgrade framework in Lasernet FO Connector 6.18 should manage but could fail when using a TFS/Dev build as this would require executing Microsoft.Dynamics.AX.Deployment.Setup.exe.

**Error message**

Error

Please try to run 'Register selection-classes' before processing.

OR

Error

Cannot create a record in Lasernet default export/import selection (LACDefaultSelection). The record already exists.

Object reference not set to an instance of an object.
