Note

The packages are for Dynamics 365 for Finance and Operations Platform Updates PU64.

Microsoft recommends that you use an ISV/LAC package matching the build or PU because it could lower memory usage. However, all packages contain the same code and are compatible with different versions.

Deployments or installations of Lاسernet Connector packages are forward compatible; for example, it is not possible to deploy or install a Lاسernet Connector package for PU60/10.0.36 when using Dynamics 365 for Finance and Operations PU59/10.0.35.
