On Demand: Lasernet 365 F&O 6.16 Release Overview

2021-10-12 - Alex Clemons - Comments (0) - Formpipe Webinars

Lasernet for Dynamics 365

Tuesday 12th October 2021 saw another excellent walkthrough of the latest release notes 6.16 of the Lasernet Connector for Dynamics 365 for Finance & Operations. We are pleased to report that we have had some positive feedback from the webinar and would like to share some of the questions and answers that were covered during the session, along with the recorded webinar and some useful links.

Questions and Answers

The following questions and answers were covered by our product experts during the session:

How do we subscribe to receive updates on knowledgebase articles?

There is an article on how to subscribe here:

https://support.formpipe.com/news/posts/how-do-i-subscribe-to-knowledgebase-articles

Can we use parameters from a form link through the Report Wizard?

Formlinks/Dialog setup/parameters - for the fields added to the dialog, the end-user either chooses from a dropdown or types the field in. We normally add them manually to the elements/structure to be able to include and use in the XML file.

Is the performance/test suite still licensed separately?

Yes - licensed separately for customers. We have a demo license for partners and resellers which you can retrieve.

Is the option to use "ReportValue:" as a yellow Element in the Report problematic?

Yes, moving a field to another section does cost a little bit. I have carried out some testing

on our warehouse label with regard to performance. It changes with 16 to 31 milliseconds over a couple of runs.

Does Lasernet support tables in the new HTML editor for forms field in PDF?
Yes.
