TEMENOS

Temenos Release Version 4.4.0

Release date: January 29th 2020

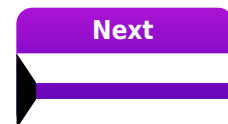

New Features and Fixes

The purpose of this section is to outline the new features and any fixes of the components of Temenos version 4.4.0.

This version requires *Log4j 1.2.12+*

New Features

- Default format for TIF image conversion has been changed from jpg to png for improved compatibility.
- Added support for auditing information to Document Download (AUTOFORM DM 9.0+ only).
- Improved Image Enquiry response handling to ensure requests and temporary files correctly cleaned up.
